Easy IT

Software Developer (Laravel)

Rangpur, Bangladesh

December 2021 - May 2022

- I worked at Easy IT as a junior backend developer (Laravel).
- Assisted senior developers at their various projects and worked as a support member as well and single handedly created a NGO Management System from scratch and a single vendor e-commerce site.

PROJECTS

NGO Management

- NGO Management System is a web application fully made by me using laravel and there were many complex logical calculations of debit,credit

Single Vendor E-commerce

- Single vendor e-commerce using laravel and frontend html,css,js.

<u>Social Media</u> Constructed This Uviom Life Social media backend along with the team using laravel,aws s3 bucket, RDS, Multi-database and hosted it to a plesk panel.	<u>Multi-vendor E-commerce</u> Built a multi-vendor e-commerce site calls Uviom Bizz which is yet to launch. All the functionality and Apis except payment gateway integration was my creation using laravel,aws s3 bucket, RDS, Multi-database and hosted it to a plesk panel. (Yet to Launch)
<u>Food Order System</u> Created Uviom Food, which is a food order system. Its backend was built using Laravel,aws s3 bucket for storage, RDS , Multi-database.(Yet To Launch)	<u>Gig Purchase System</u> Modified and built new feature of a codecanyon based project of buying and selling gigs using laravel and livewire.
